

Less is More & More for Less

Less is More is the notion that simplicity and clarity lead to good design.

Eye-catching design is a good way to attract your target audience, but if your visitors find your site difficult to use, then your stunning design won't matter because they will get frustrated and click away to a site that they can browse quickly and easily.

At Scarborough **Website** Design, we design with the user in mind. We create, clean, easy to navigate websites, which are search engine friendly, to keep **your** potential customers on **your website** and not your competitors.

How we work.

There are no disturbances to your routine, just an initial meeting to discuss your ideas. This is to get to know you, your business and your goals. Then you get to see the design process on-line, stage by stage, making amendments as and when they are needed. Your new website doesn't go live until you are 100% satisfied with everything. We promise you first class service and attention to detail that is second to none.

More for Less

It's never been easier to have an affordable website. So why not place your website's design in the hands of the local experts. Whether you are looking for a new website or to update your current site, we are ready to help you.
